# Cruz may drop Dy as 'jueteng' witness

**Bishop wary about real intention of ex-governor**

By Dennis C. Serrano and Christine E. Guzman

**PHILADELPHIA** — At least one key witness in the case of former Governor Eduardo Duque is being questioned by the prosecution.

The witness, Bishop of the Diocese of San Carlos, is being questioned by the prosecution about his alleged involvement in the case of Duque, who is accused of being involved in the "jueteng" (illegal gambling) racket.

# Police tighten security in Metro following Mindanao blasts

By David L. ...

MANILA (AP) — Philippine police have tightened security in Metro Manila and other parts of Luzon in the wake of a series of bombings in Mindanao. The police department said it was on high alert for any potential threats to the capital and other major cities. The bombings in Mindanao, which occurred over the weekend, resulted in several deaths and injuries. The police department is working closely with the military and other law enforcement agencies to investigate the attacks and prevent any further violence. The police department also issued a warning to the public to remain vigilant and report any suspicious activity to the authorities. The police department is committed to maintaining the safety and security of the Philippines and will continue to work hard to protect the lives and property of its citizens.

# Children have no future under GMA, say militants

By Juan Reyes

MANILA (Philippine Daily Inquirer) — Children have no future under GMA, say militants. The group said the government's policies are aimed at destroying the lives of the children and their families.

The group said the government's policies are aimed at destroying the lives of the children and their families. The group said the government's policies are aimed at destroying the lives of the children and their families.

# Submit 2006 budget to Congress early, Villar urges Malacañang

By Juan Reyes

MANILA (Philippine Daily Inquirer) — President Gloria Macapagal Arroyo should submit the 2006 budget to Congress early, said Vice President Noli T. De Vico.

De Vico said the budget should be submitted to Congress by June 1, 2006, to allow the House of Representatives to start its work on the budget.

De Vico said the budget should be submitted to Congress by June 1, 2006, to allow the House of Representatives to start its work on the budget.

There are many ways to get the most out of your equipment. In fact, it's not just the equipment that's important, but the way you use it. The following are some of the ways to get the most out of your equipment:

- **Use the right equipment for the job.** Don't use a hammer to drive a nail. Use a screwdriver to drive a screw. Use a wrench to tighten a nut. Use a saw to cut wood.
- **Use the equipment properly.** Read the instructions. Follow the safety rules. Don't use the equipment if you're not sure how to use it.
- **Take care of your equipment.** Clean it. Oil it. Sharpen it. Replace worn parts.
- **Use the equipment safely.** Don't drink and drive. Don't use the equipment if you're tired or distracted. Don't use the equipment if you're not trained to use it.

By following these tips, you can get the most out of your equipment and keep it in good working order for years to come.

**Abstract.** *Background:* The prevalence of low back pain (LBP) has increased in the United States and is a leading cause of disability. *Objective:* To determine the prevalence of LBP in a representative sample of the adult population in the United States. *Design:* Cross-sectional survey. *Setting:* National Health and Medical Examination Survey, a nationally representative sample of the civilian, noninstitutionalized population of the United States. *Subjects:* A representative sample of 14,720 adults aged 18 years and older. *Measures and Main Results:* The prevalence of LBP was 20.9% (95% confidence interval [CI], 19.3%–22.5%) in the past 12 months. The prevalence of LBP was higher in females than in males (23.1% vs. 18.7%, *P* = .001). The prevalence of LBP was higher in whites than in blacks (22.1% vs. 18.8%, *P* = .001). The prevalence of LBP was higher in those with a high school diploma or less than in those with a college degree or more (23.1% vs. 18.7%, *P* = .001). The prevalence of LBP was higher in those with a history of LBP than in those without a history of LBP (31.1% vs. 10.1%, *P* = .001). The prevalence of LBP was higher in those with a history of LBP than in those without a history of LBP (31.1% vs. 10.1%, *P* = .001). The prevalence of LBP was higher in those with a history of LBP than in those without a history of LBP (31.1% vs. 10.1%, *P* = .001). *Conclusion:* The prevalence of LBP is high in the United States and is associated with several risk factors. *Keywords:* low back pain, prevalence, risk factors.

Heavy rain in Manila, Philippines, on Monday, July 11, 2005.

## Rains hamper relief work; death toll to reach 1,000

**MANILA**—Heavy rain in Manila, Philippines, on Monday, July 11, 2005, hampered relief work and caused a death toll to reach 1,000.

The rain caused flooding in several areas of the city, making it difficult for relief workers to reach the affected areas.

The death toll is expected to rise as more bodies are recovered from the floodwaters.

Relief workers are working to provide food and shelter to the victims of the disaster.

**China bans  
reporters  
from site  
of disaster**

China has banned foreign reporters from the site of a major disaster in the country. The ban is part of a broader effort to control the flow of information from the disaster zone. The Chinese government has stated that the disaster zone is a sensitive area and that foreign reporters are not allowed to enter. The ban has caused concern among international media organizations, who argue that the public has a right to know about the disaster and the impact on the population. The Chinese government has responded by stating that the ban is necessary to maintain security and to ensure that the disaster zone is properly managed. The ban has also caused concern among the Chinese people, who are worried about the impact of the disaster on their lives. The Chinese government has stated that it is working to provide relief to the victims of the disaster and that it is committed to transparency in its handling of the disaster.

Figure 1: Schematic diagram of the experimental setup for the study of the effect of the concentration of the polymer solution on the morphology of the polymer film. The diagram shows a cross-section of a polymer film on a substrate. The film is composed of two layers: a top layer of polymer solution and a bottom layer of polymer film. The substrate is labeled 'Substrate'. The polymer solution layer is labeled 'Polymer solution' and the polymer film layer is labeled 'Polymer film'. The thickness of the polymer solution layer is indicated as 'h' and the thickness of the polymer film layer is indicated as 'L'. The diagram also shows the concentration of the polymer solution, 'C', and the concentration of the polymer film, 'C<sub>f</sub>'. The diagram is labeled 'Figure 1' and 'Schematic diagram of the experimental setup for the study of the effect of the concentration of the polymer solution on the morphology of the polymer film.'

# Illegal logging case vs UPLB head endorsed

MANILA, Aug. 10 (AP) — The U.S. Department of Justice has endorsed a case against the University of the Philippines (UPLB) for illegal logging. The case, which was filed in the U.S. District Court in Manila, involves the alleged illegal logging of timber in the Philippines by UPLB officials and their associates. The case is part of a larger investigation into illegal logging activities in the Philippines, which has been ongoing for several years. The U.S. Department of Justice has announced that it will continue to monitor the case and may take further action if necessary.

# GMA situation likened to Marcos twilight years Cruz may drop Dy

**By [Name]**

**Manila** — The situation at GMA is being likened to the twilight years of Ferdinand Marcos, with a possible power struggle between the network's top executives.

It is reported that the network's management is in a state of flux, with several key figures facing challenges to their positions. The network's financial performance has also been a subject of concern, leading to speculation about potential leadership changes.

One of the most prominent figures mentioned in the reports is [Name], who has been seen as a potential candidate for a leadership role. However, his appointment has not been confirmed, and the network's future remains uncertain.

The situation at GMA is seen as a reflection of the broader challenges facing the media landscape in the Philippines. As the industry continues to evolve, networks like GMA must navigate complex internal and external pressures to remain competitive.

The network's management is expected to make difficult decisions in the coming months, as they work to stabilize the organization and ensure its long-term success.

The situation at GMA is a topic of intense interest for viewers and industry observers alike. As the network's future unfolds, it will be a key indicator of the state of the Philippine media industry.

# GMA 7 revives IPO plan

By CHANIE BARR

After a decade of financial pain, the GMA 7 network is looking to revitalize its IPO plan. The network, which has been struggling since its launch in 1990, is now considering a new strategy to attract investors and viewers. The plan involves a major restructuring of the network's programming and management, with a focus on high-quality, original content. The network's leadership is confident that this new approach will lead to a successful IPO and a bright future for the GMA 7 brand.

## ENCI eyes P&B worth of projects

By Margaret L. Sommers

Figure 1 is a schematic representation of the experimental design. It shows a flow from 'Pretest' to 'Main Experiment' to 'Posttest'. The 'Main Experiment' section is further divided into 'Pretest' and 'Main Experiment' boxes, which then lead to a 'Posttest' box. The 'Main Experiment' box also includes a 'Pretest' and a 'Main Experiment' label. The 'Posttest' box contains a 'Posttest' label.

## NOTICE TO THE STOCKHOLDERS OF PRUDENTIAL BANK

Figure 1 consists of eight micrographs (a-h) showing the effect of various treatments on the growth of *P. aeruginosa* on agar plates. The top row shows control (a) and 100% ethanol (b). The second row shows 100% acetone (c) and 100% methanol (d). The third row shows 100% DMSO (e) and 100% water (f). The bottom row shows 100% glycerol (g) and 100% propylene glycol (h). The plates show varying degrees of bacterial growth inhibition, with some showing complete inhibition and others showing partial inhibition.

## BIR may ease program for tax delinquents

By Nicholas S. Bener

MANILA, Aug. 1 (UPI)—The Bureau of Internal Revenue (BIR) may ease its program for tax delinquents, according to a report from a BIR official. The official said that the BIR is considering a new program that would allow tax delinquents to pay their taxes in installments. The official said that the BIR is currently reviewing the program and that it may be implemented in the near future.

### Globe sees lower '94 revenue

By Charles S. Bener

MANILA, Aug. 1 (UPI)—The Globe newspaper's revenue for the first half of 1994 is expected to be lower than the same period last year, according to a report from a Globe official. The official said that the Globe is currently reviewing the revenue and that it may be lower due to a decrease in advertising revenue.

## DA to impose stricter rules for meat importers

By Nicholas S. Bener

MANILA, Aug. 1 (UPI)—The Department of Agriculture (DA) is considering imposing stricter rules for meat importers, according to a report from a DA official. The official said that the DA is currently reviewing the rules and that it may be implemented in the near future.

**N**anotechnology is a key component of many industries, and one of the most dynamic. Nanotechnology is the science of manipulating matter at the nanoscale, which is the scale of individual atoms and molecules. It is a multidisciplinary field that combines physics, chemistry, biology, and engineering to create new materials and devices with unique properties. Nanotechnology has a wide range of applications, from medicine to electronics, and is expected to revolutionize many industries in the future.

These items will not actually hang in the room but instead will stand with the accompanying pictures, which feature the same people.

As the study progressed, the researchers found that the more the students were involved in the learning process, the more they were able to understand the concepts and apply them in real-world situations.

But the last thing to be done is to make sure the results are "usable" by the stakeholders involved.

Finally, keep the process "flexible." By acknowledging that the results don't add up with the way it is done today, the researchers "take into account" feedback by people in the field.

And it's a winning move. It means that the authors
